Reading Skill

Identifying Main Ideas

When we read, we try to make connections between what we are reading and what we already know. It is easier to make those connections if we know the main idea of the text.

A Skim each paragraph of the passage on the next page. Then match each paragraph to its main idea.

1	 Paragraph 1	4	 Paragraph 4
2	 Paragraph 2	5	 Paragraph 5
3	 Paragraph 3		

- a There are many varieties of English.
- **b** The future of English is uncertain.
- **c** English is widely used and growing in countries like China and Russia.
- **d** The first group consists of countries with native English speakers.
- **e** Countries like India and Malaysia use their own variety of English in everyday life.
- B Skim the passage again quickly. Then complete the sentence below.

The main idea of this passage is that ______.

- a the most important type of English continues to be British English
- **b** there are many types of English, and they will continue to change
- c English will not be the international language for much longer
- C Now read the entire passage carefully. Then answer the questions on page 100.

2 10

English is called an international language, but there are actually quite a few varieties of English that **exist** around the world. English **originated** in England, but soon English spread to other countries, and different varieties of English began to exist. Today, the countries in which English is spoken can be divided into three groups.

The first group is made of those countries where English is the **primary** language. These are countries like England, Canada, the United States, Ireland, Australia, and New Zealand. There are more than 380 million native¹ speakers of English in these countries alone.

- There is a second group of countries that have their own varieties of English. 15 Their histories have been directly influenced by one of the early English-speaking societies. They use English in various important ways within their own government and everyday life. India, Malaysia, the Philippines, and Kenya are examples of this group. The total number of speakers in this group is in the hundreds of millions.
- 20 is widely used as a foreign language. However, citizens use their native language within their own government and in everyday life. Some countries in this group are China, Russia, Japan, 25 Korea, Brazil, Indonesia, and many Western European countries. Some people **calculate** the number of speakers in this group to be as many as one billion—and it is growing fast.

In a third group of countries, English

This changing **situation** raises many questions. Will another language **replace** English as the international language? If not, will people continue to use the English of countries such as England or the United States as models? Will new varieties of English **develop** in countries such as China or Brazil? Or, in the future, will a new international variety of English develop that doesn't belong to any one country, but 35 to an entire area like Asia or Europe?

¹ Your **native** language is the first language you learned to speak.

Reading Skill

Distinguishing Main Idea and Supporting Details

Many paragraphs have a main idea that is supported by a number of details. Not all details in a paragraph support the main idea; some support the supporting ideas themselves. Finding the main and most important supporting idea helps us clearly understand the writer's point.

A Read the first paragraph of the passage on the next page. Then look at the main idea and one supporting idea below. Add two more supporting details.

Main idea: Deaf people have special ways of communicating.

Supporting details:

- 1
- 2 It is possible for deaf people to speak with special voice training.
- 3

Now read the second paragraph of the passage. Then write the main idea and three supporting details.

Main idea: ______1

- 2 _____
- C Read the entire passage carefully. Then answer the questions on page 104.

- Because deaf people cannot hear, they have special ways of **communicating**. For example, they can learn to understand what someone is saying by looking at the mouth of the speaker. This is called lipreading. Also, speaking is very difficult for the deaf, because they cannot hear their own voices. However, it is possible 5 with special training. According to many deaf people all around the world, the most practical and popular way of communicating is with sign language.
- In many ways, sign language is **similar** to spoken language. The words of sign language are made with signs, which are formed with movements of the hands, face, and body. As with words, each sign has a different meaning and can be 10 combined to form sentences. Signed languages also have their own grammar. The alphabet of sign language is special hand signs that **stand for** letters; they make spelling possible. The signs combine to form a rich language that can express the same thoughts, feelings, and ideas as any spoken language. And just as people from different countries speak different languages, most countries have their own _ 15 variety of sign language.
- In addition to knowing sign language, it 3 is also helpful to know something about how deaf people communicate. Since they rely so much on actions, deaf people are 20 generally not very formal when they "talk," and may touch your arm or shoulder a lot to make sure you know what they're saying. It is not seen as rude among deaf people to lightly touch someone you do

- 25 not know to get their attention. It's also okay to wave your hands or hit the table or floor. Also, lots of eye contact¹ is necessary.
- There are many ways to learn a few signs. Community colleges often teach introductory classes. For self-learners, bookstores and libraries have books for learning sign language. There are also instructional² videos on the Internet, with 30 actors **demonstrating** signs and performing interesting stories and conversations for you to see. With practice, you'll soon get the hang of this useful method of communicating!

¹ If you make **eye contact** with someone, you look into their eyes.

² Something **instructional** is full of information, or for learning.

Distinguishing American and British Words

There can be many differences in language even between two **English-speaking** countries like the U.S. and England. Aside from differences in spelling, certain terms are used in England, and countries using British English, which may be foreign to Americans and countries that use American English, although they may refer to the same thing.

A Do you know the following words? Match the words from the box to their American or British counterparts.

elevator	rubbish	queue	soccer	pants

American	British
line	
	football
	biscuits
gas	
	lorry

- B Discuss your answers with a partner. Then answer the following questions.
 - 1 Which of these words are more commonly used in your country?
 - 2 Can you think of any more British and American English words which refer to the same thing?

Create realistic learner beliefs. Do you have certain beliefs about what it takes to be a good reader? Some of them may be unrealistic or even incorrect. Write down two beliefs you have about reading, and discuss them as a class. How can you adjust some of these beliefs to fit your learning needs?

What do you think?

- 1 Do you think technology has changed the way we communicate? How?
- 2 Do you think there will be more or less languages in the future? Why?
- 3 Does English make a good or a bad international language? Why?
