PARTNER PROBLEMS

- Work in pairs as Partner A and Partner B on your assigned problem as stated here:

A: Robin took out a \$9000 loan over 4 years. The monthly payment was \$200. How much interest did she pay for the entire loan?

B: Julia has \$1000 deductible collision insurance on her 2002 SUV. She backed into a light pole and caused \$1600 worth of damage to her car. How much of this will be paid by the insurance company?
