

“Are there more crayons?” the students ask.
“Yes, there are,” says the teacher.

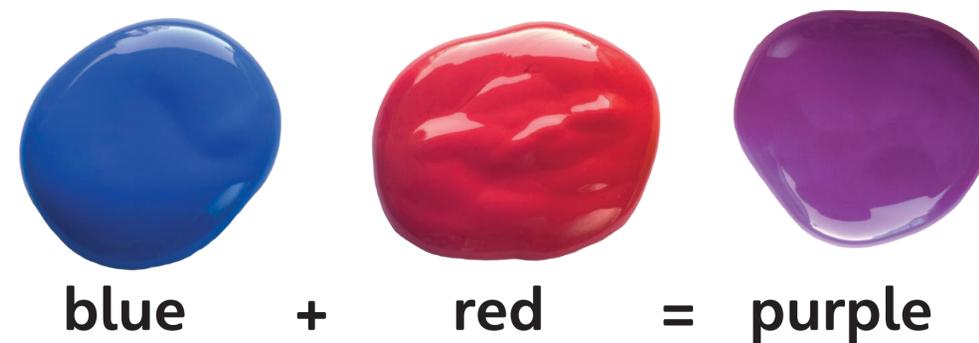

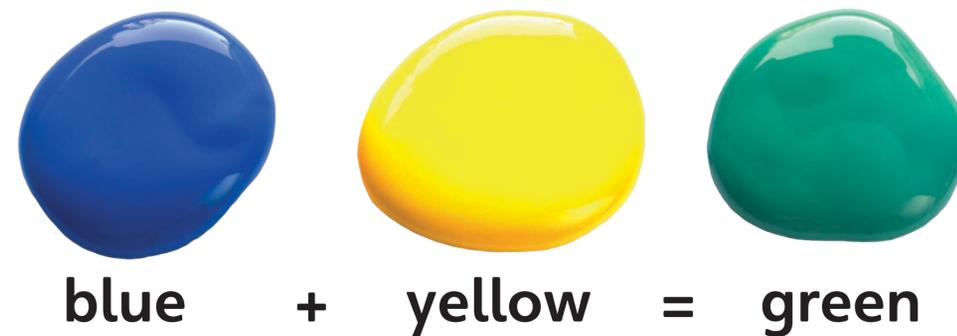

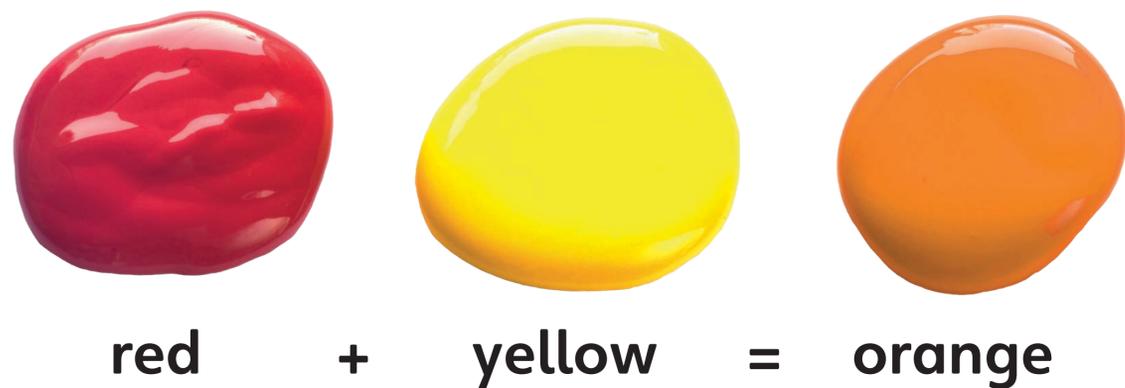

“What are you doing?” asks the teacher.
“We’re drawing and coloring pictures for our poster!” say the students.

Facts About Colors

Do you like to paint? You can make painting even more fun by mixing colors.

Red, yellow, and blue are called **primary colors**. You can mix primary colors to make other colors.

You can make even more colors by mixing primary and non-primary colors.

What other colors can you make by mixing colors?
