

People in different places get to school in different ways.

Some areas have many roads. Children in these areas often go to school by car, like these students in Mexico.

Another way children in these areas can get to school is by bus, like these students in the United States.

Facts About Transportation

The ways people travel have changed through time. A long time ago, people only traveled on animals like horses or camels, but in the late 1800s and 1900s, many new types of transportation were invented. This timeline shows a few of them.

1961
The first spacecraft carrying a human is launched.

1903
The Wright Brothers fly their first airplane.

1900 1910 1920 1930 1940 1950 1960 1970

1908
Ford makes the first popular automobile.

1928
The first helicopter is flown.

1939
The first jet airplane is flown.
