

Differentiated Instruction • Vocabulary From the Reading

Scaffolding

Have students create vocabulary cards to help them study and remember the Key Vocabulary words. Then have students work in pairs and quiz each other using the vocabulary cards. Suggest that students write the word and pronunciation clues on one side of the card and a definition with a sample sentence on the other.

Extension

Have students create word search puzzles using the Key Vocabulary words. Tell them to write their words across, down, or diagonally in squares on a piece of graph paper. Next, they should randomly fill in the other squares with additional letters. Finally, ask them to trade their puzzles with other students.
