Ensure skills and standards mastery!

At Heinle, a part of Cengage Learning, we have made learning resources for struggling students our expertise. Our programs feature differentiated instruction to support IEPs (Individualized Education Plans); easy-to-access activities; short, simple lessons; and motivating, age-appropriate content that can help learners become more successful in class and on state exams. A broad range of technology materials accompany all of our products, including audio and video, e-books, and interactive assessment software, which assist in reinforcing comprehension of essential skills and concepts.

All material in this catalog is perfect for IDEA funded programs!
**Use Prior Knowledge**

**Talk About Being on Time**
Are you always on time? For example, if school starts at 8:00, are you always at school by 8:00? Look at the chart. Is it important to be on time for these things? Copy the chart. Choose very important, important, or not important for each.

Shark Attack!

- The great white shark, the largest fish that lives in the ocean, can grow up to 19 feet in length and weigh up to 5,000 pounds!

- Some people are more scared of swimming with sharks than with any other type of animal, but did you know that sharks don’t actually see very well? They rely on their sense of smell to find their prey.

- The great white shark is a powerful predator with sharp teeth and strong jaws. It can swim up to 30 miles per hour and has been known to reach speeds of over 60 miles per hour!

- Although sharks are often portrayed as terrifying creatures, they play an important role in our oceans. They help control the populations of other marine animals and are an important part of the food chain.

- People who are afraid of sharks are often called “shark phobics.” There are treatments available to help people overcome their fear, but it’s important to remember that sharks are just another animal, not something to be feared.

The most common explanation for why some people are so afraid of sharks is that they think of them as dangerous predators. However, most sharks are not predatory at all, and the vast majority of shark attacks on humans are due to mistaken identity. It’s important to remember that sharks are just another animal, and while they can be dangerous predators, they are not something to be feared.

The great white shark is not only the largest fish in the ocean, but it’s also one of the most powerful predators. With its sharp teeth and strong jaws, it can bring down even a large seal or sea lion in just a few bites. But despite its size and power, the great white shark is actually a very intelligent animal, and it’s known to avoid humans whenever possible. The next time you’re out in the ocean, remember that the great white shark is not something to fear, but rather a beautiful and fascinating creature that we should help protect.

Wind power is something that’s easily found in the gorge which divides Washington and Oregon. That makes the Columbia River Gorge one of the best places in the world to kiteboard. However, for inventor Cory Roeser, the gorge is more than just a place to have fun; it’s a place where he can test his new inventions.

Roeser has always loved water sports. When he was a teenager, he was the first person to “test pilot,” or try out, the sport of kite-skiing. Usually, people water-ski behind a boat. However, Roeser decided to use wind power to ski behind a kite. It worked! Later, he became a mechanical engineer. Then, in the 1990s, he invented and designed a lot of water sports equipment. Eventually, he became famous in the area of water sports.

**Sequence the Events**

What is the correct order of the events? Write numbers.

- invented water sports equipment
- became famous
- was a test pilot for kite-skiing
- became mechanical engineer

The Cell

**Vocabulary**

**Phage Question:** What are the parts of a cell?

1. cell
2. cytoplasm
3. cell membrane
4. chloroplast
5. vacuole
6. nucleus
7. endoplasmic reticulum
8. ribosome
9. golgi complex
10. lysosome
11. mitochondria
12. cell wall

**Vocabulary in Context**

All living things are made up of one or more cells. Cells are the smallest unit of life. All cells have a cell membrane. It controls what moves into and out of a cell. Most cells have other parts, such as a nucleus, vacuoles, ribosomes, and lysosomes. The nucleus controls all activity in the cell. Vacuoles store water, food, and waste. Ribosomes build proteins. Lysosomes break down, or digest, material.

---

**Check Your Understanding**

1. Look at the plant cell and animal cell. Name five parts that both cells have.
2. What does the nucleus do?
3. What one part do all cells have?
4. Why do cells have many different parts?

In my Schoolbag

Rhyme Time
I emptied my schoolbag on the floor.
There was a binder, paper, some money, and more.
There were notebooks, rulers, a pencil case,
a textbook, a stapler, and an eraser to erase.
Mom said, “I know you need pencils and pens.
But I don’t understand. Why do you need ten?”
The complete vocabulary resource for struggling readers!
